CONFIDENTIAL

ADP-3

FBIS/2605-88
14 December 1988

MEMORANDUM FOR: [redacted] 25X1
OSO/OG/SSC

FROM: [redacted] 25X1
Chief, Field Engineering Division/FBIS

SUBJECT: Progress Report on DISC Project

1. Monthly meetings have been held since the inception of the project, and I have attended each meeting. Together with intermediate drafts of the deliverables, these meetings have kept us fully informed of the contractor's progress, with which I am satisfied.

2. Given the unavailability of the Maxtor drive, the contractor has been able to obtain an Olympus magneto-optic drive for test and evaluation as a substitute. This work was done on the initiative of the contractor, with my knowledge. The testing has proceeded in a satisfactory fashion.

3. The storage equipment and funding delays have stretched out the project somewhat, but have provided an opportunity for concurrent development of the system specification, the design specification, and experimentation with some off-the-shelf versions of key elements of the needed digital signal processing hardware. The results have suggested the need for some redefinition of project goals within the available resource limits. The contractor is proceeding satisfactorily in this direction.

4. A request for contract amendment is being prepared to reflect the above changes. No increase in funding is planned--only reprogramming within existing contract limits--with no decrease in level of effort. Because of the schedule delays, an extension of two months on contract completion is anticipated.
